

Safety and Productivity. Delivered.

Ultra Lite™

Breathing air just got easier to transport.

Introducing the all-new Ultra Lite, a compact, highly-portable stackable breathing air system. Thanks to its innovative carbon fiber cylinders, it weighs less than the commercial standard of 1001 lbs and withstands higher pressure to still produce 3000 cubic feet of air despite its reduced dimensions.

Its smaller footprint allows it to be transported in the bed of a ½ ton pickup truck, eliminating the need for CDL, reducing logistical challenges and delivery costs and avoiding additional issues like on and off loading with a forklift.

The result? An ultra-compact breathing air system that allows you to enjoy unmatched mobility.

www.unitedsafety.net

Key Features

- Weight is below requirements for CDL w/hazmat license for drivers
- Fits in standard ½ ton truck bed
- Provides 25 hours of breathing air for one person or six hours of breathing air for a crew of four
- Stackable (up to three) to minimize footprint
- It can be fit into a customizable trailer that holds up to 8 Ultra Lite (24,000cu ft of air)
- The trailer can also hold a combination of Ultra Lite, work areas or lockable tool storage based on customer's needs

Technical Specification	
Air capacity	3,000cu ft of air at 5,000psi
Dimensions	22" (H) 47"(W) 62"(L)
Weight (full)	< 750lbs
Crew capacity	8 people
