EH&S OnSite™

Promoting your company's QHSE culture

- Leadership in planning and implementing QHSE management systems
- Increase onsite Quality, Health, Safety, Environment awareness and participation
- Highly qualified Environmental, Health and Safety specialists for onsite safety services

Safety and Productivity. Delivered.

Your partner in safety for the Oil and Gas industry.

United Safety is a global safety solutions provider specializing in safety equipment, personnel and services for the Oil and Gas industry. With over 28 years of experience and global operations in the Americas, Middle East, Africa, Europe and Asia, we have built an impressive track record and earned a reputation for safety services you can rely on.

At the forefront of innovative safety services, United Safety provides state-of-the-art safety equipment technology for breathing air and gas detection systems, proprietary processes that increase productivity and highly qualified personnel.

United Safety, assurance that your operations are in safe hands.

Highly competent personnel working to keep you safe

From drilling operations to processing plants, having our EH&S OnSite™ specialists provides you with a resource to mitigate site risk and associated costs and losses. They implement your onsite QHSE initiatives among employees and contractors ensuring compliance to your Safety Management System (SMS). Our EH&S OnSite™ services provide support, guidance and direct interaction in order to foster meaningful change within an organization.

United Safety offers resources with relevant experience to deliver on small, medium and large projects focusing in the Oil and Gas, Pipeline and Construction industry. As a requirement, all our EH&S OnSite™ specialists are certified to meet or exceed industry regulations. They also have several years of hands-on experience with additional educational certificates and accreditations and the motivation for continued success.

Working closely with the EH&S OnSite™ services team, an in depth needs assessment will be completed. The data gathered will assist the EH&S OnSite™ services team in developing a customizable solution to your varying needs depending on the industry, workplace and the types of hazards affecting your employees.

By investing in a team of dedicated account managers, we are in constant contact with our customers to ensure that our EH&S OnSite™ specialists exceed expectations. We listen to our customers and use their feedback to continuously improve our services.

Key benefits

Safety expertise: Our EH&S OnSite™ specialists are certified and highly trained. Their knowledge is backed by several years of hands-on experience in the field. This prepares them to quickly identify problems before they have a negative impact on your operations.

Improving safety culture: EH&S OnSite™ specialists focus on operational safety by reviewing processes and practices. They then help develop your company's safety culture through active onsite implementation.

Increasing productivity: Increase worker productivity by reducing the number of worker absences and equipment downtime.

Saving money: Increasing worker productivity, lowering incidents, implementing safety culture helps companies cut costs.

Flexibility: The responsibilities of the EH&S OnSite™ specialist vary by industry, workplace and types of hazards affecting employees. Working closely with your organization, United Safety will provide a customized solution designed to help achieve your particular QHSE objectives.

Responsibilities of the EH&S OnSite™ specialists

EH&S OnSite™ specialists will maximize value for customers by focusing on the following:

- Inspect and evaluate practices to ensure they follow they follow safety standards and government regulations
- Demonstrate the correct use of safety equipment
- Job Safety Analysis (JSAs) reviews and quality checks
- Educate employers and workers about workplace safety
- Hazard identification (HAZID)
- Hazard action logs
- Support incident and accident investigation to identify causes and future preventive measures
- Safety orientations
- Safety meetings
- Workplace/worksite monitoring and auditing
- QHSE technical administration support

Customer Testimonials

"It is my pleasure to recommend the services of United Safety in relation to their ability to provide competent, versatile and trustworthy health and safety professionals for onsite field based positions. We have been using their services for the duration of one of our SAGD construction site projects for the past three years and in that time they have proven to be versatile and very flexible in providing certain individuals with the skill sets that we have requested."

- Harvest Operations Corp.

"Devon Canada Corporation has enlisted United Safety to provide support to our Operations, Maintenance and Turnaround projects for many years. During these turnarounds, United Safety provided me with six experienced safety personnel to assist me in these large-scale projects as EH&S generalists. Some of the many responsibilities of these advisors included providing administration support, daily field inspections, leading evacuation drills, hosting tool box talks, assisting with incident investigations and most importantly interfacing with the other contract services on site as an acting Devon Representative. The United Safety employees that have come onto site over the years have gained high respect from Devon employees as well as the many contract support personnel."

- Devon Jackfish

"On behalf of Shell Canada Limited and United Safety, we would like to recognize and thank you for your valuable work in creating a legislative reference guide to accompany Shell's Life Saving Rules. Your efforts help increase the awareness towards the need for compliance to these rules. Your dedication and commitment serve as a vital link in the chain which drives GOAL ZERO."

- Shell Canada Energy
