

# Calibration Kit

Heavy-duty calibration kit.

## Cost effective calibration and bump test management

This impact-resistant calibration kit comes in a plastic case, ensuring trouble-free transportation and increased safety.

### Key Features

- Gas type O<sub>2</sub>, CO, H<sub>2</sub>S, CH<sub>4</sub> (other gases optional).
- Cylinder size 58L.
- Flow rate 0.5Lpm.
- Temperature range – 14 to 52 degrees C.
- NIST traceable span gases.
- Non-refillable cylinders.
- Flow regulator with pressure gauge.
- Carrying case.

### Key Benefits

- The calibration kit helps to improve the measurement performance of the gas monitor instruments.
- Reduce measurement errors and improve consistency between measurements.
