SPECIFICATION SHEET

EPIC 3 Voice Amplifier

More effective communications.

Introduction

Our partner Scott Safety's EPIC 3 helps to improve communication on site by amplifying the user's voice. It offers more than double the battery life of other models available in the market.

Key Features

- Automatic Shutoff Amplifier.
- Intrinsically safe for use with commercially available alkaline and NiMH AAA batteries.
- Durable, rugged design.
- Ribbed, textured surface.
- On/ Off button with tactile surface makes it easy to recognize activation with a gloved hand or in a noisy environment.
- Angled directional speaker projects an amplified voice in the direction the user is facing.
- Upgradeable to include radio interface and talk-around, multi-channel functionality.
- NFPA- and NIOSH-approved (NFPA approvals 2002/2007, submitted for 2013 approval).

EPIC 3 Voice Amplifier

More effective communications.

Key Benefits

- More than double the battery life when compared to other models.
- Reduced costs of battery replacement and improved equipment readiness.
- Robust enough to withstand day-to-day rigors, even in the most extreme applications.
- More secure handling even with wet-gloved hands.

Technical Specifications

Approvals and Certifications	Submitted for NFPA 1981 2013 approvals, the EPIC 3 passed the heat and flame test, high heat and flame test, radiant heat test and the 30-minute tumble test, and holds IP 66 and 67 ratings. The EPIC 3 is backwards compatible to work with NFPA 1981, 2002 and 2007 SCBA.
Battery Life	50 hours
