Provision of certified Emergency Response Personnel, services and equipment to ensure safe and on-time operations.

Provided high angle instructors, certified locally trained Emergency Response Teams (ERT), and specialized rescue kits to ensure smooth facility operations.

Challenge

Unavailability of qualified, certified Emergency Response Personnel to support facility activity.

Solution

United Safety to provide all Emergency Response personnel, equipment and safety training.

Results

Smooth, safe and effective activities without any delays caused by lack of safety equipment or personnel. Peace of mind knowing that operations were in safe hands.

The major IOC had planned confined space and high angle training in their Angola operations. To ensure that their operations met their SOP and project compliance standards, the decision was made to work with United Safety on this important project on an ongoing basis.

Angola

KEY CUSTOMER BENEFITS

Met stringent compliance standards and ensured customer stayed on schedule

To achieve compliance standards, United Safety provided locally qualified, certified and knowledgeable emergency rescue personnel along with certified rescue equipment.

United Safety was involved in the pre-planning stages of the projects. This brought valuable experience and knowledge to the table in coordinating and planning with the persons in charge and allowed customer to carry out their operations without any delay caused by safety lapses.

Provided a comprehensive set of skills, equipment and services

The customer benefited from United Safety's above-standard and high quality certified rescue equipment which goes through regular and stringent testing and quality assurance processes. Equipment included breathing air cascade systems, high angle rescue kits, Confined Space Entry (CSE) equipment packages and gas detection monitors.

The customer also benefited from United Safety's custom-made rescue plans and fall arrest pre-plans and training, tailored to perfectly fit customer requirements. United Safety further provided highly qualified and certified managers/instructors, high angle rescue technicians, CSE entry watch, area watch and bottle watch. United Safety has a full-time recruitment and training department that strives to attract, select, test, hire and retain people who have the character required to positively impact those around them, further assuring the customer that they were working with a high quality service provider.

All-round, dependable support 24 hours a day

The IOC benefited from having access to a complete set of United Safety's services. Operations management and certified high angle CSE rescue teams were on call 24 hours a day. State-of-the-art, best-in-class equipment packages and efficient dispatch from our base in Angola were at customer's request as required.
